

CONNECT AND COLLABORATE VIRTUALLY IN THE SAME ROOM

Make your hybrid workspace actually work for everyone with the right UCC Solutions.

The corporate landscape has changed and more and more companies are enabling a remote or hybrid workforce. Planning a meeting is no longer just about selecting the right location but more about how the space will be utilized, selecting the right platform to accommodate employees near and far, and the content that is being shared.

Different room types and technologies require different canvases, as does utilizing different video conferencing platforms. Nanolumens offers purpose-built solutions to address business pain points and difficult workflows that arise with remote collaboration.

BRING EVERYONE INTO THE SAME ROOM

Introducing our new UCC optimized formats. Engage NXT is now available in 3 sizes: 16:9 and new ultra-wide formats 21:9 and 32:9. These new display sizes are optimized for Microsoft Teams, including the new Front Row feature, Google Meet and Zoom platforms.

16:9

21:9

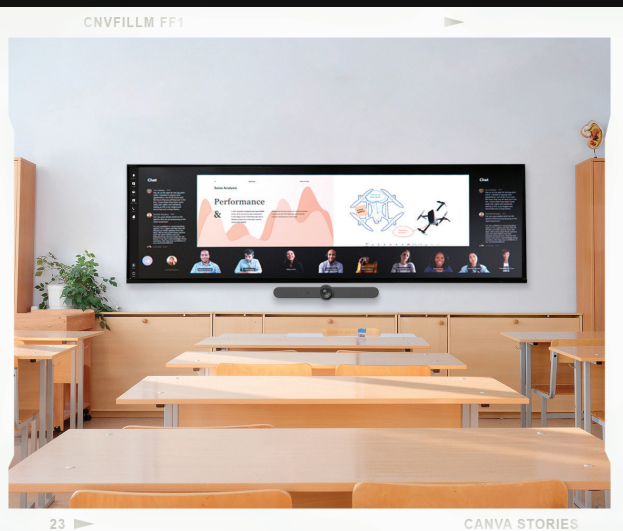

32:9

WITH EVERY MEETING.

Larger rooms with many remote participants typically require an ultra-wide display optimized to ensure a seamless meeting experience.

Why choose UCC Bundles from Nanolumens

- Complete systems including processing
- Nanolumens EXPERT INSTALLATION available
- No distractions from Gaps and Bezels with LED displays
- Designed for compatibility with major UCC Platforms
- Fully compatible with Logitech and other UCC Solutions
- Available through major distribution partners

MEET VIRTUALLY EVERYWHERE TOGETHER.

BENEFITS OF ULTRA-WIDE LED

Seamless canvas

Clear and reliable display

More natural and immersive experiences

Engage with whiteboards, notepads & chats

5 Reasons to Choose an Ultra-Wide LED Display for Your Meeting Room

01

Color Reproduction

More pixels (about 33% more) provide a clearer and seamless canvas, making it a reliable way to have meetings or video calls without difficulty in viewing reports or presentations.

02

Optimize & Collaborate

Display formats optimized to match and enhance different meeting technologies allowing presenters to collaborate with whiteboards and notepads, maximizing participants' engagement capabilities.

03

Seamless Viewing

No more tiles for your conference calls.

04

Facilitate Teamwork

Compatible with Microsoft Teams Front Row and Zoom so your team can communicate plans effectively.

05

Average Lifespan

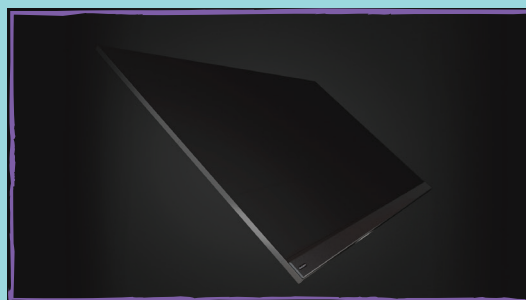

LED displays have longer lifespan of >100,000 hours.

THE POWER OF PARTNERSHIP

Do-It-Yourself Meeting in a Box

All-In-One LED Solution

Nanolumens' Captivate Series is the perfect complement to premium UCC meeting rooms.

Captivate is easy to sell, install and use. Available in 3 HD screen sizes to fit almost any use case, it comes standard with 3 HDMI inputs, Diverse Screen Presets (PXP), speakers, and RS-232 Controls for all major control systems.

Paired with the Logitech meeting room solutions, this meeting in a box is setting the standard for video collaboration. Logitech solutions ensure:

- Ease of Use
- Reliability
- Professional Appearance
- Partner Compatibility

*The Logitech® Rally family of all-in-one video bars and modular conference camera systems delivers the performance, installation ease, and device management tools you need to video-enable small, medium, large, and multipurpose rooms throughout the workplace.
